The original languages of the book is Hebrew and English. The original publication place of the book is Israel. The original publication year of the book is 2011. Download Sapiens PDF: You can download Sapiens: A Brief History of Humankind PDF ebook free via the download button below. Sapiens: A Brief History of Humankind is a history book by Yuval Noah Harari, first published in Hebrew in Israel in 2011 based on a series of lectures Harari taught at The Hebrew University of Jerusalem, and in English in 2014. Most books about the history of humanity pursue either a historical or a biological approach, but Dr. Yuval Noah Harari breaks the mold with this highly original book that begins about 70,000 years ago with the appearance of modern cognition. From examining the role evolving humans have played in the global ecosystem to charting the rise of empires, Sapiens integrates history and science to reconsider accepted narratives, connect past developments with contemporary concerns, and examine specific events within the context of larger ideas. Dr. Harari also compels us to look ahead, because over the last few decades humans have begun to bend laws of natural selection that have governed life for the past four billion years. We are acquiring the ability to design not only the world around us, but also ourselves. Where is this leading us, and what do we want to become? Title: Sapiens: A Brief History of Humankind Author(s): Harari, Yuval, Noah Publisher: Signal Year: 2019;2014 Edition: Cloth edition Language: English Pages: 464 pages : illustrations, maps ; 24 cm 0 ISBN: 9780771038501, 9780771038525, 077103850X Size: 14 MB (14446810 bytes) Extension: PDF Book Description of Sapiens: A Brief History of Humankind Book Destined to become a modern classic in the vein of Guns, Germs, and Steel, Sapiens is a lively, groundbreaking history of humankind told from a unique perspective. 100,000 years ago, at least six species of human inhabited the earth. Today there is just one. Us. Homo Sapiens. How did our species succeed in the battle for dominance? Why did our foraging ancestors come together to create cities and kingdoms? How did we come to believe in gods, nations, and human rights; to trust money, books, and laws; and to be enslaved by bureaucracy, timetables, and consumerism? And what will our world be like in the millennia to come? In Sapiens, Dr. Yuval Noah Harari spans the whole of human history, from the very first humans to walk the earth to the radical — and sometimes devastating — breakthroughs of the Cognitive, Agricultural, and Scientific Revolutions. Drawing on insights from biology, anthropology, palaeontology, and economics, he explores how the currents of history have shaped our human societies, the animals and plants around us, and even our personalities. Have we become happier as history has unfolded? Can we ever free our behaviour from the heritage of our ancestors? And what, if anything, can we do to influence the course of the centuries to come? Bold, wide-ranging and provocative, Sapiens challenges everything we thought we knew about being human: our thoughts, our actions, our power...and our future. Author(s): Yuval Harari Publisher: Signal, Year: 2014 ISBN: 077103850X Size - 6.6 MB Table of contents : Timeline of history — pt. One : The cognitive revolution : An animal of no significance The tree of knowledge A day in the life of Adam and Eve The flood — pt. Two. The agricultural revolution : History's biggest fraud Building pyramids Memory overload There is no justice in history — pt. Three. The unification of humankind : The arrow of history The scent of money Imperial visions The law of religion The secret of success — pt. Four. The scientific revolution : The discovery of ignorance The marriage of science and empire The capitalist creed The wheels of industry A permanent revolution And they lived happily ever after The end of Homo sapiens — Afterword: The animal that became a god. This book was first published in Hebrew in Israel in 2011. This book is based on the series of lectures Harari taught at the second oldest Israel university "Hebrew University of Jerusalem", this university was established in July 1918 and officially opened in the year 1925 on the month of April. The Sapiens book PDF was translated and published in the English language in the year 2015. This book by Harari mainly focuses on Homo sapiens, and surveys the history of mankind, starting from the Stone Age to the 21st century. The author divides the history of Sapiens into 4 major sections: 1st Section - The Cognitive Revolution (c. 70,000 BCE, when imagination evolved in Sapiens).2nd Part- The Agricultural Revolution (c. 10,000 BCE, the development of agriculture).3rd Section - The unification of humankind (c. 34 CE, the gradual consolidation of human political organizations towards one global empire).4th Section - The Scientific Revolution (c. 1543 CE, the emergence of objective science). Harari's main argument is that sapiens came to dominate the world because it was the only animal that existed in large numbers and could cooperate in its own way. They argue that prehistoric sapiens were an important cause of the extinction of other human species such as Neanderthals(Humans who lived in Eurasia until about 40,000 years ago) and many other Megafauna(Gaint animals). He also discussed that the ability of Sapiens to cooperate in large numbers stems from their unique ability to believe in things that exist solely in fiction, such as gods, nations, human rights, and wealth. Harari's major claim about the Agricultural Revolution is that the population growth of most people and animals is worse when sapiens were mainly hunters. The violent manners of humans towards other animals is a theme that runs throughout the book. The Sapiens PDF book is translated into more than 60 different languages and the translation of the English version was published on 2015. This book won the National Library of China's Wenjin Book Award for the best book published in 2014, The Royal Society of Biologists in the UK shortlisted Sapiens book in its 2015 Book Awards. This book was also recommended by Bill Gates and Mark Zuckerberg, and this book is on the list of top ten favorite books of Bill Gates. Author Yuval Noah Harari Book Different Editions It's
